

How to identify the Router Application Kit (RAK) modem type

The DNP/9200 RAK comes with a preinstalled analogue, ISDN or GSM/GPRS/EDGE modem. This document shows the three different modem types.

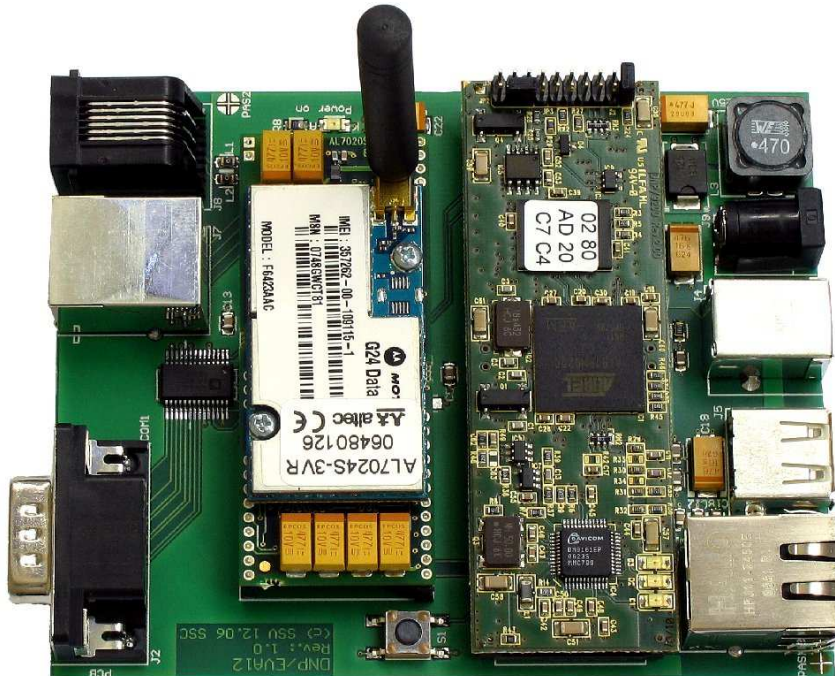

- **Analogue Modem:** The analogue modem is the **MT5600SMI-L-92**. The following picture shows the RAK with preinstalled MT5600SMI-L-92 modem.

- **ISDN Modem:** The ISDN modem is the **MT128SMI-L**. The following picture shows the RAK with preinstalled MT128SMI-L modem.

- **GSM/GPRS/EDGE Modem:** The GSM modem is the **AL7024S**. The following picture shows the RAK with preinstalled AL7024S modem. The GSM unit of the AL7024S is a Motorola G24.

Please note: The AT command description for each modem is available over the DIL/NetPC DNP/9200 Starter Kit CD-ROM version 1.4 or later.

That is all.
